

A rustic barn-studio situated in the heart of the beautiful Black Forest of Germany provides the perfect atmosphere and inspiration for the artist and designer - Uwe Merz.

Born in 1963 near Dortmund and trained in Hamburg; Uwe built his experience in the field of commercial advertising. Using this know-how and understanding, he later developed his own unique form of artistic and intuitive expression.

Leading edge digital technology combined with his »palette-knife technique«, has empowered Uwe to explore and develop a completely new form to express the symbiotic relationships between industrial design and artistic expression. »art on panel« digital composing technique using professional image editing tools opens new doors for individual creative development.

With a special 6-colour-UV-digital-direct-printing-technique the objects are printed to a high-quality 3mm-composite material with a unique finish. It's also possible to use further substrate materials such as acryl glass, glass, wood, metal, cloth, canvas, synthetics. There are some standard motives that may be purchased, but our real focus is on special designs with your individual motif, size and colour design.

This can be an exceptional gift for friends or family with unparalleled personalisation achieved through the combination of people's faces and a particular object that is personal to them. Be it a car, yacht, house, landscape or indeed just about anything.

»art on panel« also provides a very special opportunity to deliver an artistic gift to your customers. The use of German artwork to personalise your products to your customer recognises an important relationship and will deliver many years of pleasure.

Further potential uses are for example calendars with individual motifs or exclusive design panels for trade fairs.

Let us create some ideas for you, the options are endless.
